

**INNOVATIVE
COMPONENTS, INC.**

for Innovative Solutions

CNC MACHINING

Innovative Components offers CNC precision machining. We employ both bar fed CNC lathes as well hand load CNC lathes.

Whether your precision machining service order is simple or complex, a short run or high volume production, Innovative guarantees turn-key mechanical precision component solutions tailored to your requirements. We ensure exact tolerance and precise positioning, supplying you with consistent quality CNC machined parts.

Our machining centers offer multi axis capabilities, custom designed quick-change fixtures, and live tooling for all your turning and milling requirements. We can machine parts with extremely small diameters or up to 6" in diameter.

We machine materials from carbon steel, aluminum, brass, copper, stainless steel, some plastics, polycarbonate, wood, UHDPE, graphite and more.

On site operations and capabilities includes EDM, laser etch, acid texture, sand blast, welding, heat treat, machining, design, polishing, assembly, crimping, grinding, and 3D Printing.
