

**INNOVATIVE
COMPONENTS, INC.**

for Innovative Solutions

CUSTOM MOLDING

We are experts at all types of insert molding, over-molding, and multi-material molding. We utilize state of the art horizontal and vertical injection molding presses. Our highly competitive shop rates allow us to offer attractive solutions for applications that require molding, secondary machining or trimming, decorating such as pad printing, and assembly.

Innovative Components fully owns and operates a state of the art tool and die machine shop in our off shore Costa Rican factory. All tools are designed and made from start to finish utilizing our inhouse expertise and equipment. Our Costa Rican labor rates allow us to compete with similar offshore mold producers around the world.
