NYLON TIPPED FASTENERS

Innovative Components specializes in nylon tipped fasteners. Nylon tipped fasteners are used to lock against shafts where insulating value or conforming properties of nylon are desired. Our fasteners lock tight and won't mar the mating surface or the mating part.

LOCK: Collars / Pulleys / Bearings / Cams... to Shafts

PROTECT: Finished surfaces and threads

CONTROL: Restrict shaft end play

ISOLATE: Noise dampening tips available

INSULATE: Non-conductive tips available

Nylon tips are available in:

- Set Screws
- Tap Bolts, Cap Screws, Hex Bolts, and Hex Head Machine Screws
- Socket Head Cap Screws
- Plastic knobs w/ studs
- Thumb Screws

Set Screws are available in stainless steel or alloy bodies in standard and metric sizes ranging from #6-32 thru 1/2"-13

These fasteners are perfect for:

- Tool & Die Shops
- Printing Machinery Manufactures
- Packaging Machinery Manufactures
- Accessory Items
- Machine Tools
- Maintenance & Repair Operations (MRO)
- Instruments
- Electronic Products
- Valves
- Appliances
