QUICK RELEASE PIN RECEPTACLES

Pin receptacles are a great alternative for affixing ball lock pins to your machinery in cases where your pin doesn't have a surface to lock against. Pin receptacles are bolted down to the equipment and act as a permanent mating hole. Insert the pin through the hole. Once the ball detents are able to pop up on the opposite end of the hole, the pin will stay in place.

Receptacles are available in diamond, round, and oval shaped housings with hole sizes of $\frac{1}{4}$, $\frac{5}{16}$, $\frac{3}{8}$, and $\frac{1}{2}$ diameters. Receptacle mounting hole size is 6-32, except $\frac{1}{2}$ " diameter pin receptacles have mounting holes of 10-32. Stocked receptacles are available in stainless steel.
