SNAP-LOCK KNOBS

Available in Star, 3-Prong, & T-Knob Styles

Snap-Lock Knobs allow users to assemble their own knobs with the nut or bolt of their choice.

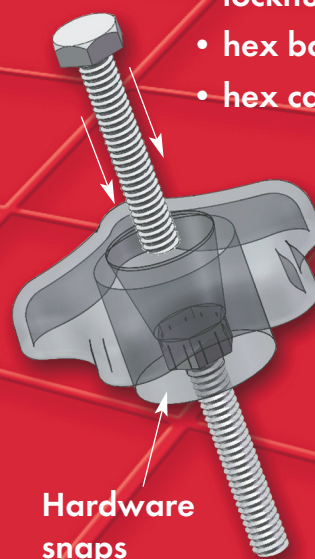

This uniquely designed knob is perfect for MRO, prototypes, jigs & fixtures, and unusual lengths and/or materials of fasteners.

The Snap-Lock Knobs are molded with a hex hole of the appropriate size to accept a standard hex nut, locknut, hex bolt, or hex cap screw. Fasteners can easily be pushed into position and snapped into the hex hole for a secure fit. Snap-Lock Knobs are offered in a variety of sizes and styles. Knobs are available in inch thread diameters of 1/4", 5/16" & 3/8" as well as metric sizes M6, M8, M10. We also stock a wide variety of nuts and bolts to accompany your Snap-Lock Knobs.
