UNIVERSAL BALL KNOBS & UNIVERSAL TAPERED KNOBS

Our universal knobs are unique and efficient as one knob fits multiple thread sizes.

Universal Knobs are available in both the ball knob style and teardrop shift knob style.

There are no tools required when assembling these self-tapping/self-threading knobs.

With knob diameters that range from 1-1/8" to 1-7/8", we have a knob that is perfect for any application.

Universal Knobs are vibration resistant and will stay on mating parts without glue or Loctite®. Since Universal Knobs have no metal insert, you won't have to worry about rust.

When you need a knob that conveys the ultimate image of luxury and quality, consider our Soft Touch Universal Ball or Tapered Knob with an over-molded layer of supple rubber for a sure, comfortable grip. Decorate your knob with a pad printed or hot stamped logo or design for a truly unique look.
